The Lyman Briggs College is a residential college that bridges the science and humanities through interdisciplinary teaching and research. It provides students with a fundamental core science education in mathematics, chemistry, biology, and physics. Additionally, the core program addresses historical, philosophical, and societal concerns and consequences of modern science, technology, the environment, and medicine. Advanced undergraduate courses in the student’s major are taken in the respective departmental units of the College of Natural Science, College of Engineering, College of Agriculture and Natural Resources, and the University at large. The majority of Lyman Briggs students pursue programs leading to advanced graduate study in the natural sciences, or professional programs related to medicine, dentistry, veterinary medicine, allied health, education or law. Many other students plan to enter careers in teaching at the secondary level, science writing, product representation, industry, or government service upon completion of their Bachelor of Science degree.

As a residential college, Lyman Briggs College has classrooms, laboratories, faculty offices, academic advisor offices, and administrative offices located in Holmes Hall, where all first year and many upper-level Lyman Briggs students live and learn. Because of this residential organization, students are able to develop a strong living-learning community identity by integrating academic and personal development, with faculty, staff and their peers in residence. Students are encouraged to balance their academic lives with social, cultural, athletic, service-learning, and leadership opportunities on campus and in the greater East Lansing community.

Students admitted to Michigan State University are admissible to Lyman Briggs College based initially on application date. There are no additional academic or program requirements for freshman admissions. Enrollment in the college is limited; therefore students are encouraged to apply early. Applicants should indicate their intention to become a part of the Lyman Briggs College on the Michigan State University Application for Admissions. If a student has already submitted an application and would like to apply to Lyman Briggs College, she/he should contact the Office of Admissions directly as early as possible.

Students work closely with their academic advisors and faculty in developing an individualized academic plan. All students enter the program as ‘no major’ status and may declare a major as early as summer orientation or by the time they have earned 56 credit hours.

Lyman Briggs College offers two minors: Bioethics; and History, Philosophy and Sociology of Science. Lyman Briggs College also participates in two minors: Entrepreneurship and Innovation; and Science, Technology, Environment, and Public Policy.

Students who are enrolled in the environmental biology/microbiology and microbiology coordinate majors in Lyman Briggs College may elect the Minor in Food Processing and Technology. For additional information, refer to the Minor in Food Processing and Technology statement in the Department of Food Science and Human Nutrition statement in the College of Agriculture and Natural Resources section of this catalog.

Admission as a Freshman to Lyman Briggs College
Any student who meets the general requirements for admission to the university as shown in the Undergraduate Education section of this catalog may enroll in Lyman Briggs College, pending available space.

Transfer Students
All students in good academic standing in Lyman Briggs College may transfer at any time to other programs at Michigan State University for which they are eligible, in order to accommodate changing academic needs and interests.

Students who wish to transfer into Lyman Briggs College should contact the Student Success and Advising Office to discuss with a recruiter. Space in Lyman Briggs College is limited.
The Lyman Briggs College program leads to the Bachelor of Science Degree.

Requirements for the Bachelor of Science Degree in Lyman Briggs College

1. The University requirements for bachelor’s degrees as described in the Undergraduate Education section of this University catalog. 120 credits, including general elective credits, are required for the Bachelor of Science degree in Lyman Briggs College.

Students who are enrolled in Lyman Briggs College may complete the alternative track to Integrative Studies in Biological and Physical Sciences that is described in item 1, under the heading Graduation Requirements in the College statement. Certain courses referenced in requirement 3 below are equivalent to courses in the alternative track and, therefore, may be used to satisfy the alternative track.

The completion of the Lyman Briggs College mathematics and statistics requirement [referenced in item 3.c.(4) below] may also satisfy the University mathematics requirement.

The completion of Lyman Briggs 133 or one of the approved alternatives [referenced in requirement 3.a.(5)(a) below] may also be counted toward the University Tier II writing requirement.

The University's Tier II writing requirement for the Major and Coordinate Majors in Lyman Briggs College is met by completing Lyman Briggs College 492 and one of the following courses: Lyman Briggs College 321A, 321B, 322A, 322B, 323A, 323B, 324A, 324B, 325A, 325B, 326A, 326B, 327A, or 327B. Those courses are referenced in items 3.a. (5) and 3.a. (6) below.

2. The requirements of Lyman Briggs College for the Bachelor of Science degree, referenced in item 3. a. below.

The credits earned in certain courses referenced in requirement 3. b. below may be counted toward College requirements as appropriate.

3. The following requirements of Lyman Briggs College for the Bachelor of Science degree:

b. MAJOR or COORDINATE MAJOR:

Each student must complete the requirements of a Major or a Coordinate Major. The Major or Coordinate Major must be chosen from the lists of options below. Both the Major or Coordinate Major and the related courses must be approved by the student's academic advisor. With the approval of the appropriate Lyman Briggs College Curriculum Coordinator or Undergraduate Director, courses other than those that are listed as requirements for a Major or Coordinate Major may be used to satisfy degree requirements.

Majors:

- Biology
- Computer Science
LYMAN BRIGGS COLLEGE
Undergraduate Program

3. Earth Science .................................................................................................................. 27
   a. A minimum of 27 credits from the courses listed below including:
      (1) At least 14 credits in courses at the 300–400 level.
      (2) At least 8 courses in earth science courses outside the Department of Earth and Environmental Sciences.
      (3) At least one course in each of the following 5 earth science areas (15 to 22 credits):
          (a) Astronomy and Astrophysics
              AST 207 The Science of Astronomy .............................................. 3
          (b) Geology of the Solid Earth
              GLG 201 The Dynamic Earth ......................................................... 4
              GLG 321 Mineralogy and Geochemistry ........................................ 4
              GLG 351 Structural Geology and Tectonics .................................... 4
              GLG 361 Petrology (W) ................................................................. 4
              GLG 401 Plate Tectonics (W) ......................................................... 4
              GLG 481 Reservoirs and Aquifers .................................................. 3
              GLG 491 Field Geology – Summer Camp (W) ................................. 6
          (c) Paleobiology
              GLG 431 Sedimentology and Stratigraphy (W) ............................... 4
              GLG 433 Vertebrate Paleontology .................................................. 4
              GLG 434 Evolutionary Paleontology .............................................. 4
              PLB 335 Plants Through Time ......................................................... 3
          (d) Environmental Geosciences and Meteorology
              GEO 203 Introduction to Meteorology ............................................ 3
              GEO 401 Geography of Plants of North America ............................. 3
              GEO 402 Agricultural Climatology .................................................. 3
              GEO 405 Weather Analysis and Forecasting .................................... 4
              GEO 421 Environmental Geochemistry .......................................... 4
          (e) Geomorphology
              CSS 470 Soil Resources .................................................................. 3
              GEO 407 Regional Geomorphology of the United States ................. 3
              GEO 408 Soil Geomorphology Field Study ...................................... 4
      Other courses as approved by advisor.

4. Environmental Sciences and Management ..................................................................... 41
   a. A minimum of 41 credits from the courses listed below including:
      (1) One of the following groups of courses (8 or 10 credits):
          (a) LB 118 Calculus I ................................................................. 5
          (b) STT 231 Statistics for Scientists ................................................ 3
          (b) MTH 132 Calculus I ............................................................... 4
          (b) MTH 133 Calculus II ............................................................... 4
          (b) STT 231 Statistics for Scientists ................................................ 3
          (2) One course from each of the following 7 areas
              (24 to 26 credits):
                (a) Ecology: ZOL 355 Ecology .................................................. 3
                    ZOL 355L Ecology Laboratory .................................................. 1
                (b) Geology: GLG 201 The Dynamic Earth .................................. 4
                (c) Taxonomy or Phylogenetic Biology: ENT 404 Fundamentals of Entomology .................................................. 4
                    PLB 418 Plant Systematics ......................................................... 3
                    ZOL 306 Invertebrate Biology .................................................... 4
                (d) Biochemistry: SMB 401 Basic Biochemistry .................................. 4
                (e) Aquatic Systems: FW 420 Stream Ecology .................................. 3
                (f) Microbiology: MMG 301 Introductory Microbiology .......................... 3
                (g) Economics: EC 201 Introduction to Macroeconomics .................. 3

5. Physical Science .............................................................................................................. 31
   a. A minimum of 31 credits from the courses listed below including:
      (1) The following course:
          LB 220 Calculus III ........................................................................ 4
      (2) At least 27 credits in chemistry courses, in physics courses, or in chemistry and physics courses approved by the student's academic advisor. At least 20 of the 27 credits must be in chemistry courses or physics courses and must meet the conditions specified below:
          For students who elect to complete at least 14 credits in chemistry courses, at least 6 of the 14 credits must be laboratory credits at the 300–400 level.
          For students who elect to complete at least 14 credits in physics courses, at least 6 of the 14 credits must be in modern physics, and at least 3 of the 14 credits must be laboratory credits.
          Students who elect Sociology 452 must also complete Sociology 452L, to meet requirement 4. a. (3) (a).

6. History, Philosophy and Sociology of Science ............................................................... 24
   A minimum of 24 credits in 300–400 level courses chosen from the following:
   History, Philosophy, and Sociology of Science content approved by the student's HPS academic advisor. Courses used to fulfill general education, major, and major cognate requirements may be used to fulfill these requirements. A minimum of four courses from Lyman Briggs must be selected. Additional courses outside of Lyman Briggs may be used with advisor approval.
   CSUS 464 Advanced Direct Study- History, Philosophy, Sociology .......................... 3
   ENG 473A Literature and Medicine ................................................................. 3
   FW 439 Conservation Ethics .............................................................................. 3
   GEO 435 Geography of Health and Disease ...................................................... 3
   HRT 486 Biotechnology in Agriculture: Applications and Ethical Issues ................. 3
   IBIO 446 Environmental Issues and Public Policy ............................................. 3
   LB 304 Lesbian, Gay, Bisexual, Transgender, Queer (LGBTQ) and Sexualities .......... 3
   LB 321A Science and the Public- Social Sciences (W) ............................................ 4
   LB 321B Science and the Public- Social Sciences (W) ............................................ 4
   LB 322A Advances in Science and Technology- Arts and Humanities ................. 4
   LB 322B Advances in Science and Technology- Social Sciences ......................... 4
   LB 323A Science in a Global Context- Arts and Humanities (W) ......................... 4
   LB 323B Science in a Global Context- Social Sciences (W) ................................. 4
   LB 324A Science and Sex, Gender, Sexuality- Arts and Humanities (W) ................. 4
   LB 324B Science and Sex, Gender, Sexuality- Social Sciences (W) ......................... 4
   LB 325A Science and the Environment- Arts and Humanities (W) ......................... 4
   LB 325B Science and the Environment- Social Sciences (W) ................................. 4
   LB 326A Medicine and Health- Arts and Humanities (W) ...................................... 4
   LB 326B Medicine and Health- Social Sciences (W) ............................................. 4
   LB 327A Scientific Practice- Arts and Humanities (W) .......................................... 4

MINOR IN BIOETHICS

The Minor in Bioethics, which is administered by Lyman Briggs College, is available as an elective to students who are enrolled in bachelor’s degree programs at Michigan State University. The minor is designed to prepare students to engage with the evolving set of ethical issues in biomedicine that they will encounter in their careers or their daily lives. The minor’s interdisciplinary character fosters students’ abilities to understand and question health care systems from a wide variety of intellectual viewpoints. Such interdisciplinary study also promotes communication across disciplinary boundaries.

Students wishing to pursue careers in health-related fields may find the minor particularly appealing. In addition, students pursuing academic programs outside health-related fields often find that the minor complements their major. With the approval of the department and college that administer the student’s degree program, the courses that are used to satisfy the requirements for the minor may also be used to satisfy the requirements for the bachelor’s degree.

Requirements for the Minor in Bioethics

1. Both of the following courses (3 credits):
   LB 240 Bioethics: Theories and Methods ............................. 2
   LB 440 Bioethics Capstone .................................................. 1

2. Complete 15 credits from at least four courses. No more than 8 credits may be from the same discipline. Students should work with the advisor for appropriate substitution requests.
   ANP 270 Women and Health: Anthropological and International Perspectives .................................................. 3
   ANP 370 Culture, Health, and Illness .................................... 3
   ANP 423 Psychological Anthropology .................................. 3
   ANP 425 Issues in Medical Anthropology ............................. 3
   ANP 471 The Anthropology of Alternative Medicine ............. 3
   ANS 427 Environmental Toxicology and Society .................. 3
   CEP 470 Disability in a Diverse Society .............................. 3
   EC 498 Economics of Health Care (W) ............................... 3
   ENG 473A Literature and Medicine ...................................... 3
   EPI 390 Disease in Society: An Introduction to Epidemiology and Public Health .................................................. 3
   GEO 435 Geography of Health and Disease ............................ 3

MINOR IN HISTORY, PHILOSOPHY AND SOCIOLOGY OF SCIENCE

The Minor in History, Philosophy and Sociology of Science, which is administered by Lyman Briggs College, is designed to increase students understanding of the epistemological foundations and ethical elements of science while learning more of the history of some areas of science and appreciating the complex ways that science is connected to other social institutions and practices.

The minor is available as an elective to students who are enrolled in a bachelor’s degree program in Lyman Briggs College at Michigan State University. Students majoring in History, Philosophy and Sociology of Science in Lyman Briggs College are not eligible for the minor. With the approval of the college, the courses that are used to satisfy the minor may also be used to satisfy the requirements for the bachelor’s degree.

Students who plan to complete the requirements for the minor should consult an undergraduate advisor in Lyman Briggs College.

Requirements for the Minor in History, Philosophy and Sociology of Science

A minimum of 20 credits in 300–400 level courses chosen from the following with History, Philosophy, and Sociology of Science content approved by the student’s HPS academic advisor. A minimum of three courses from Lyman Briggs must be selected. Additional courses outside of Lyman Briggs may be used with advisor approval.

CSUS 310 History of Environmental Thought and Sustainability .................................................. 3

LYMAN BRIGGS COLLEGE 3 + 4 OPTION

Lyman Briggs College, in collaboration with the MSU College of Osteopathic Medicine, offers an opportunity for selected Lyman Briggs College students to earn a baccalaureate degree after satisfactory completion of a minimum of 90 credits at Michigan State University and a minimum of 30 credits through subsequent enrollment at the Michigan State University College of Osteopathic Medicine. Only students who matriculate as first-year students at Lyman Briggs College may pursue this option. Students interested in this option should consult with their college academic advisor during their first year in the college.
Admission to the MSU College of Osteopathic Medicine component of this program is limited to a small number of students who complete the specified university and college requirements and who fulfill admission requirements for the MSU College of Osteopathic Medicine Doctor of Osteopathic Medicine program.

All students in this program will complete a minimum of 90 credits at Michigan State University in the Lyman Briggs College Biology major. The requirements for the program are as follows:

1. Completion of all the Michigan State University graduation requirements, including integrative studies and general education.
2. Completion of the Lyman Briggs College graduation requirements including mathematics, chemistry, biology, physics, and history, philosophy and sociology of science.
3. Be pursuing the curriculum for the Lyman Briggs College Biology major.
4. Completion of a minimum of 30 credits at the MSU College of Osteopathic Medicine in the preclerkship component of the Doctor of Osteopathic Medicine degree program.

Upon satisfactory completion of the specified 120 credits, students in this program will be eligible for the Bachelor of Science degree in Lyman Briggs College with a major in Biology.
