Special Problems in Anatomy 480

Fall, Spring, Summer. 1 to 5 credits. A student may earn a maximum of 15 credits in all enrollments for this course. R: Approval of department. SA: ANT 480

Topics from an anatomical field such as gross anatomy, histology, tissue culture, cytology, neurology, or embryology.

485 **Directed Study in Human Prosection**

Fall, Spring, Summer. 2 to 4 credits. A student may earn a maximum of 15 credits in all enrollments for this course. P:M: (ANTR 350 or ZOL 328 or KIN 217) R: Open only to iuniors or seniors

Prosection of selected regions and isolated structures of preserved human cadavers.

534

Cell Biology and Physiology I
Fall. 3 credits. Interdepartmental with Physiology; Biochemistry and Molecular Bi-Physiology; Biocnemistry and molecular a ology. Administered by Department of Physiology. R: Open only to graduate-professional students in the College of Human Medicine or College of Osteopathic Medicine.

Modern concepts of cell biology as a basis for understanding the physiology of human tissues and organ systems in health and disease.

Cell Biology and Physiology II

Spring. 4 credits. Interdepartmental with Physiology; Biochemistry and Molecular Bology. Administered by Department of Physiology. R: Open only to graduate-professional students in the College of Human Medicine or the College of Osteopathic Medicine.

Modern concepts of cell biology as a basis for understanding the physiology of human tissues and organ systems in health and disease. Continuation of PSL 534.

551 **Medical Gross Anatomy**

Fall. 6(4-6) R: Open only to graduateprofessional students in the College of Human Medicine or College of Osteopathic Medicine or approval of department. SA: ANT 551

Human regional gross anatomy with clinical correlations using prosections, cross-sections, medical imaging, multimedia and hypermedia.

552 Medical Neuroscience

Spring. 4(3-2) Interdepartmental with Neurology and Ophthalmology; Physiology; Radiology. Administered by Department of Neurology and Ophthalmology. R: Graduate-professional students in colleges of Human Medicine and Osteopathic Medicine. SA: ANT 552

Correlation of normal structure and function of the human nervous system with clinical testing, classical lesions, and common diseases.

Medical Histology Spring. 3(2-2) R: Graduate-professional students in colleges of Human Medicine and Osteopathic Medicine. SA: ANT 562

Histology of the human body.

585

Directed Study in Human ProsectionFall, Spring, Summer. 1 to 5 credits. A student may earn a maximum of 15 credits in all enrollments for this course. P:M: (ANTR 551) R: Open only to graduate-professional students in the College of Human Medicine or College of Osteopathic Medicine and approval of department.

Prosection of selected regions and isolated structures of preserved human cadavers. Oral presenta-

VETERINARY **ANATOMY**

ANTV

College of Veterinary Medicine

Comparative Veterinary Gross Anatomy

Fall. 6(2-10) R: Open only to graduateprofessional students in the College of Veterinary Medicine. SA: ANT 515

Canine anatomy. Comparisons with ruminant, porcine, and equine anatomy.

Veterinary Histology and Cell BiologyFall. 4(3-2) R: Open only to graduate-professional students in the College of Veterinary Medicine, SA: ANT 516

Principles of developmental, cellular, and molecular biology as related to veterinary medicine.

Veterinary Neuroanatomy
Spring. 1(1-0) R: Completion of Semester 1 of the graduate-professional program in the College of Veterinary Medicine. SA: ANT 517

Introduction to the anatomy of the nervous system using the canine species as a model.

Veterinary Gross Anatomy Dissection

Spring. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. P:NM: (ANTV 515) R: Open only to graduate-professional students in College of Veterinary Medicine. SA: ANT 610

Dissection and prosection of selected regions of domestic animals.

Research Problems in Veterinary Anatomy

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to graduate-professional students in the College of Veterinary Medicine. Approval of department. SA: ANT 611

Veterinary gross anatomy, cell biology, histology, or neurobiology.

ANIMAL SCIENCE ANS

Department of Animal Science College of Agriculture and Natural Resources

110 Introductory Animal Agriculture
Fall, Spring. 4(3-2) SA: ANS 112
History of animal agriculture and its relationship to human needs, production systems, marketing, and environmental considerations. Current goals of and limitations affecting U.S. farm animal production.

Introductory Judging of Livestock or 200A Carcasses Spring, 1 to 2 credits. A student may earn a

maximum of 3 credits in all enrollments for this course, P:NM: (ANS 211) R: A student may earn a maximum of 8 credits from ANS 200A, ANS 200B, ANS 200C, ANS 200D, ANS 300A, ANS 300B, ANS 300C and ANS 300D

Evaluation of functional conformation of beef cattle, sheep and swine and their carcasses. Preparation for intercollegiate competition. Field trips required.

Introductory Judging of Dary Cattle Spring. 1 to 2 credits. A student may earn a

maximum of 3 credits in all enrollments for this course. R: A student may earn a maximum of 8 credits from the following courses: ANS 200A, ANS 200B, ANS 200C, ANS 200D, ANS 300A, ANS 300B, ANS 300C and ANS 300D. SA: ANS 200B

Evaluation of functional conformation of dairy cattle. Preparation for intercollegiate competition. Field trips required.

200D **Introductory Judging of Horses**

Spring. 1 to 2 credits. A student may earn a maximum of 3 credits in all enrollments for this course. R: A student may earn a maximum of 8 credits from ANS 200A, ANS 200B, ANS 200C, ANS 200D, ANS 300A, ANS 300B, ANS 300C and ANS 300D. SA: **ANS 200B**

Evaluation of functional conformation and performance of horses. Preparation for intercollegiate competition. Field trips required.

Animal Products

Fall. 4(3-3) R: Not open to freshmen. Edible animal products. Processing, preservation, storage and distribution of dairy, meat, and egg products.

Animal and Product Evaluation

Fall. 3(1-4)

Evaluation of breeding stock, market animals and carcasses. Production records and soundness of breeding animals. Quality grading, yield grading and pricing of market animals and carcasses.

Merchandising Purebred Livestock

Spring of odd years. 2(1-2) RB: (ANS 110) Purebred livestock industry. Private treaty and auction sales. Advertising, animal selection and budgeting of purebred livestock sales. Field trips required.

Introductory Beef Cattle Management Spring. 3(2-2) RB: (ANS 110) Not open to 222

students with credit in ANS 422.

Management practices and systems for beef herds. Feed requirements, reproduction, breeding, performance testing, housing, and diseases. Costs and returns. Field trips required.

232 **Introductory Dairy Cattle Management**

Fall. 3(2-2) Not open to students with credit in ANS 432

Principles and techniques of dairy herd management including calf and heifer care plus lactating and dry cow management.

242 **Introductory Horse Management**

Fall. 3(2-2) Not open to students with credit in ANS 442

Principles of horse management. Reproduction, nutrition, herd health, genetics, economics, marketing. Field trips required.

252 Introduction to Management of Avian **Species**

Fall of odd years, 3(2-2)

Management of commercial poultry flocks and aviaries. Feed requirements, reproduction, breeding, housing and disease.

Principles of Animal Environments

Spring. 2(1-2) Interdepartmental with Agricultural Technology and Systems Management. Administered by Department of Agricultural Engineering. SA: AE 061, ATM 326

Animal environment requirements. Heat and moisture production rates. Psychrometrics of air and building materials. Heat loss and ventilation systems. Offered first ten weeks of semester.

262

Introductory Sheep Management Spring. 3(2-2) R: Open only to sophomores or juniors or seniors.

Principles of sheep management: genetics, reproduction, nutrition, marketing, and economics. Field trips required.

272 **Introductory Swine Management**

Fall. 3(2-2) Not open to students with credit in ANS 472.

Swine production principles, practices, technologies, and systems. Field trips required.

275 Seafood Systems Management

Spring. 3 credits. Interdepartmental with Fisheries and Wildlife; Food Science. Administered by Department of Fisheries and

Domestic and international perspectives on major aquatic foods. Cultural and nutritional value: wild harvest; aquaculture; processing technology; food handling and food safety.

Advanced Livestock Judging Fall of even years. 2 credits. P:NM: (ANS 300A

200A) R: Not open to freshmen. A student may earn a maximum of 8 credits from ANS 200A, ANS 200B, ANS 200C, ANS 200D, ANS 300A, ANS 300B, ANS 300C and ANS 300D

Evaluation of conformation and performance records of beef cattle, swine and sheep. Represent MSU in intercollegiate competition. Field trips required.

300B **Advanced Meat Evaluation and Grading**

Fall. 2(0-4) P:NM: (ANS 200A) R: Not open to freshmen. A student may earn a maximum of 8 credits from ANS 200A, ANS 200B, ANS 200C, ANS 200D, ANS 300A, ANS 300B, ANS 300C and ANS 300D.

Evaluation of beef, pork, and lamb carcasses and wholesale cuts according to industry standards. Federal grading standards. Field trips to meat packing operations required. Represent MSU in intercollegiate competition.

300C

Advanced Dairy Cattle Judging Fall. 2 credits. P:NM: (ANS 200C) R: Not open to freshmen. A student may earn a maximum of 8 credits from ANS 200A, ANS 200B, ANS 200C, ANS 200D, ANS 300A, ANS 300B, ANS 300C and ANS 300D.

Evaluation of conformation of various breeds of dairy cattle. Represent MSU in intercollegiate competition. Field trips required.

300D

Advanced Horse Judging
Fall. 2 credits. P:NM: (ANS 200D) R: Not open to freshmen. A student may earn a maximum of 8 credits from ANS 200A, ANS 200B, ANS 200C, ANS 200D, ANS 300A, ANS 300B, ANS 300C and ANS 300D.

Evaluation of functional characteristics of horses. Represent MSU in intercollegiate competition. Field trips required.

305 Applied Animal Behavior

Spring. 3(2-2) P:M: (BS 111)

Techniques for assessing health and welfare of domestic animals based on their behavior.

Principles of Animal Feeding and 313 Nutrition

Fall. 4(3-2) P:M: (BS 111) and (CEM 143 or concurrently or CEM 251 or concurrently) and completion of Tier I writing requirement.

Principles and practices of nutrition for cattle, horses, poultry, sheep and swine. Metabolism of protein, minerals, and vitamins. Diet formulation. Performance prediction, Nutritional maladies, Field trip required.

314 **Genetic Improvement of Domestic Animals**

Fall. 4(3-2) P:M: (BS 111) and (MTH 110 or concurrently or MTH 116 or concurrently) and completion of Tier I writing requirement.

Molecular, Mendelian, population, and quantitative genetics of domestic animals.

Anatomy and Physiology of Farm 315

Animals
Spring. 4(3-2) P:M: (BS 111) and completion of Tier I writing requirement.

Gross and microanatomy of farm animals. Structure directed function of tissues. Endocrine integration for homeostasis. Regulation of growth, lactation, and reproduction. Homeorhesis.

320

Spring. 3(2-3) Interdepartmental with Food Science. P:M: (ANS 210 or FSC 211 or HNF 150)

Structure of muscle. Meat technology and merchandising concepts.

Issues in Animal Agriculture

Spring. 1(2-0) P:NM: (ANS 313 or ANS 314 or ANS 315) R: Open only to juniors or sen-

Societal issues related to local, national and international animal agriculture.

Advanced Genetics of Farm Animals 404 Spring. 2(1-2) P:M: (ANS 314)

Application of molecular genetics techniques to animal breeding. Genome maps for domestic species. Incorporation of genotype data into selection programs.

Endocrinology of Reproduction Fall. 4(3-2) P:NM: (ANS 315) R: Not open to freshmen or sophomores.

Endocrine regulation of reproduction. Cellular and molecular aspects of gametogenesis, folliculogenesis, sexual cycles, fertilization, sex differentiation, gestation, and parturition. Technology to regulate reproduction.

407

Food and Animal Toxicology
Fall. 3(3-0) Interdepartmental with Food
Science. P:M: (BMB 200 or BMB 401) and (PSL 250) R: Not open to freshmen or sophomores.

Fate and effects of chemicals in the food chain. Impact on animal production. Residues in food products. Food safety assessment. Control meth-

407L **Toxicology Methods Laboratory**

Fall. 2(0-4) Interdepartmental with Food Science. P:NM: (ANS 407 or concurrently) R: Not open to freshmen or sophomores.

Laboratory techniques for evaluating potential toxicity of chemicals to living systems. Field trip to industrial toxicology laboratory required.

413 Non-Ruminant Nutrition

Spring. 4(3-2) P:NM: (ANS 313) R: Not open to freshmen or sophomores.

Nutrition of horses, swine and poultry. Digestive and metabolic development and nutrient requirements. Relationships of genetics, endocrinology, immunology, and environment to nutrition.

Advanced Animal Breeding

Spring. 2(2-0) P:M: (ANS 314) R: Not open to freshmen or sophomores.

Application of selection principles and mating systems within and among breeds of livestock. Selection index, expected progeny differences, animal models, crossbreeding systems, multiple ovulation and embryo transfer schemes, multiple trait selection, simulated populations.

Growth and Musculoskeletal Biology 415

Spring. 3(3-0) P:NM: (ANS 315) R: Not open to freshmen or sophomores.

Principles of growth in mammalian and avian species. Regulation of bone, cartilage, connective tissue, fat, and muscle metabolism. Extracellular matrix proteins and their function. Introduction to musculoskeletal diseases.

Meat Science and Muscle Biology Fall. 2(2-0) P:NM: (ANS 315) R: Not open to freshmen or sophomores.

Structure, composition, development and function of muscle and its conversion to meat. Properties of fresh and processed meat. Microbiology, preserv ation, palatability, inspection and sanitation, nutritive value, and by -products.

417

Topics in ToxicologySpring. 1(1-0) Interdepartmental with Food Science. P:NM: (ANS 407) R: Not open to freshmen or sophomores.

Selected topics including regulatory toxicology, risk assessment, environmental toxicology, food safety, and safe handling of toxic substances.

418 **Comprehensive Nutrient Management Planning**

Fall. 3(2-2) Interdepartmental with Biosystems Engineering. P:M: (ANS 110 or BE

Comprehensive nutrient management plans (CNMP) for animal feeding operations. Trends in animal production, environmental issues, and diet formulation and their impact on manure production. Devdopment of CNMP for a specific animal feeding op-

Advanced Beef Cattle Feedlot 422 Management Fall. 3(2-2) P:M: (ANS 222)

Feedlot management systems and issues. Feed systems, manure management, health maintenance, and cattle marketing. Field trips required.

Principles of Animal Biotechnology 425

Fall of odd years. 3(3-0) P:NM: (BS 111) and (CEM 143 or concurrently and CEM 251 or concurrently)

Application of molecular biology concepts to the improvement of domestic animals. Transgenic animal production, molecular genetics and marker assisted selection.

Environmental Toxicology and Society

Spring of odd years. 3(3-0) Interdepartmental with Environmental Engineering; Sociology. P:NM: (ISB 200 or ISB 202 or ISB 204 or ISB 206H or BMB 200 or BS 111 or BS 110)

Impact of environmental chemicals on health and modern society. Cellular and organ functions and their interface with the environment. Limitations of scientific investigation and environmental regulations

Advanced Dairy Cattle Management

Fall. 3(2-2) P:M: (ANS 232) R: Not open to freshmen or sophomores. SA: ANS 498

Management techniques for operating a dairy herd. Mastitis control, reproductive and nutrition management, records, and general herd health. Field trips required.

Advanced Horse Management 442

Spring. 3(2-2) P:M: (ANS 242) P:NM: (ANS 313) R: Not open to freshmen or sophomores

Management of stables and breeding farms. Pedigree and conformational selection, reproduction. Promotion, marketing, economics. Nutrition and feeding, facilities, and herd health. Field trips reauired.

Equine Exercise Physiology Fall. 4(3-2) P:NM: (ANS 313 and ANS 315) Research in equine exercise science. Physical,

physiologic, metabolic and mental adaptation to athletic training. Nutrition and bioenergetics of muscle metabolism. Field trip required.

455

Avian Physiology Spring. 4(3-3) P:NM: (ANS 315) R: Open only to juniors or seniors or graduate students.

Systemic and comparative physiology of birds: respiration, reproduction, endocrinology, digestion, urination, and the senses.

Statistical Methods for Biologists I 464

Fall. 3(3-0) Interdepartmental with Statistics and Probability; Crop and Soil Sciences. Administered by Department of Statistics and Probability. P:NM: (STT 421)

Biological random variables. Estimation of population parameters. Testing hypotheses. Linear correlation and regression (prediction). Analyses of counted and measured data to compare several biological groups (contingency tables and analysis of variance).

465 Statistical Methods for Biologists II

Spring. 3(3-0) Interdepartmental with Statistics and Probability; Crop and Soil Sciences. Administered by Department of Statistics and Probability. P:NM: (STT 464)

Concepts of reducing experimental error: covariance, complete and incomplete block designs, latin squares, split plots, repeated-measures designs, regression applications, and response surface de-

Advanced Swine Management

Fall of even years. 3(2-2) P:M: (ANS 272) R: Not open to freshmen or sophomores. SA: ANS 498

Management techniques for operating a swine herd. Management of reproduction and nutrition, records, and general herd health. Integration of husbandry and business principles for decision making. Field trips required.

Aquaculture

Spring. 3(3-0) Interdepartmental with Fisheries and Wildlife. Administered by Department of Fisheries and Wildlife. P:NM: (ANS 313 or ZOL 355)

Propagation and rearing of aquatic organisms used for food, bait and recreational fisheries management. Culture principles and techniques for important aquatic species. Commercial potential.

480 **Animal Systems in International** Development

Fall, Spring, Summer. 3(3-0) A student may earn a maximum of 6 credits in all enrollments for this course. R: Not open to freshmen. Approval of department; application

Animal systems in various global regions. Output, land and resource conservation, and socioeconomic factors.

Ruminant Nutrition Spring. 3(3-0) P:NM: (ANS 313 and ANS 315) R: Not open to freshmen or sophomores

Physiology and metabolism in ruminants. Prehension, digestion, metabolism, absorption, and distribution of nutrients for productive functions. management strategies and diet Feeding formulation. Field trip may be required.

Independent Study

Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course. P:NM: (ANS 210) and (ANS 313 and ANS 314 and ANS 315) R: Open only to juniors or seniors. Approval of department; application required.

Independent study in genetics, nutrition, physiology, toxicology, meat science, or management of poultry, livestock, or horses.

Professional Internship in Animal Science

Fall, Spring, Summer. 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to juniors or seniors in the Animal Science major. Approval of department; application required. A student may earn a maximum of 6 credits in all enrollments for any or all of these courses: ABM 493, AEE 493, ANR 493, ANS 493, CSS 493, FIM 493, FW 493, HRT 493, PKG 493, PRM 493, PRR 493, and RD 493.

Supervised professional experience in the animal

Senior Thesis in Animal Science 499

Fall, Spring, Summer. 3 to 9 credits. A student may earn a maximum of 9 credits in all enrollments for this course. P:NM: (ANS 313 and ANS 314 and ANS 315) R: Open only to seniors. Approval of department; application required. Maximum of 10 credits may be earned in ANS 499 and ANS 490.

Individual studies in an area of choice with both oral and written final communications. Topic to be determined by student and guidance committee.

511

Animal Science for Veterinarians
Fall. 2(2-0) R: Open only to graduateprofessional students in the College of Veterinary Medicine.

Husbandry of domestic, laboratory, and zoo animals. Managerial systems in animal agriculture. Production and management goals.

Animal Nutrition for VeterinariansSpring. 2(2-0) R: Open only to graduate-professional students in the College of Veterinary Medicine.

Nutrition for domestic animals and wildlife. Comparative nutrient digestion and metabolism. Nutritive requirements for maintenance, growth, reproduction, lactation, and work.

807

Advanced Food Toxicology
Fall of even years. 3(3-0) Interdepartmental with Food Science; Human Nutrition and Foods. Administered by Department of Food Science and Human Nutrition. R: Approval of department.

Toxicology related to food safety. Metabolism of toxicants as influenced by food constituents, mutagenesis, and chemical carcinogenesis. Risk assessment.

Gastrointestinal Microbiology of 810 **Domestic Animals**

Fall. 3(3-0)

Microbial ecology of gastrointestinal tract. Microbial role in nutrition, health, and productivity. Environmental applications. Livestock species emphasized.

Techniques in Animal Biotechnology

Summer of odd years. 3(2-2) P:NM: (BMB 462 or BMB 472) R: Approval of Department; Application Required.

Basic molecular biology procedures with emphasis on mammalian systems.

Methods of Quantitative and Molecular 824 **Genetics for Livestock**

Spring of odd years. 3(2-2) P:NM: (ANS 404)

Quantitative and molecular methods for animal geneticists. Identification and evaluation of molecular markers, genome maps, linkage and segregation analyses, optimal mating designs, and marker-quantitative trait loci associations in livestock species

Animal Biotechnology 825

Spring of even years. 3(3-0) R: Approval of department; application required.

Basic concepts in animal biotechnology. Application of molecular biology to animal studies. Current topics in animal biotechnology and use of animals in pharmaceutical development.

826 **Livestock Immunogenetics**

Fall of odd years. 4(3-2) P:NM: (ANS 404 or ANS 425)

Evaluation and exploration of indicator traits and candidate genes of immunocompetence that contribute to resistance or susceptibility to infectious diseases of livestock.

Integrated Risk Assessment of **Environmental Hazards**

Spring of odd years. 3(3-0) R: Open only to graduate students in the College of Agriculture and Natural Resources or College of Engineering or College of Human Medicine or College of Natural Science or College of Osteopathic Medicine or College of Veterinary Medicine.

Alternative approaches to assessing environmental and health risk. Analyzing, interpreting, and using scientific data from ecology, agriculture, environ-mental chemodynamics, biology, geological sci-ences, and toxicology in the risk assessment proc-

841 Advanced Endocrine Physiology and Pharmacology

Fall. 4(4-0) Interdepartmental with Physiology; Pharmacology and Toxicology; Psychology. Administered by Department of Physiology. P:NM: (BMB 461 and PSL 432) R: Open only to graduate students in the Colleges of Human Medicine, Osteopathic Medicine, Veterinary Medicine, Natural Science, and Agriculture and Natural Resources.

Basic and advanced concepts of endocrine and reproductive physiology and pharmacology.

842 Population Genetics, Genealogy and

GenomicsFall. 3(3-0) Interdepartmental with Forestry; Crop and Soil Sciences: Genetics: Fisheries and Wildlife; Horticulture. Administered by Department of Forestry. RB: Pre-calculus, basic genetics

Population genetic processes underlying patterns of molecular genetic variation. Genealogical approaches to the study of genomic div ersity, phylogenetic reconstruction, and molecular ecology.

Techniques of Analyzing Unbalanced Research Data

Spring. 4(4-0) Interdepartmental with Crop and Soil Sciences; Forestry; Fisheries and Wildlife; Horticulture. P:NM: (STT 464) R: Open only to graduate students in the College of Agriculture and Natural Resources. SA: ANS 943

Linear model techniques to analyze biological research data characterized by missing and unequal number of observations in classes. Simultaneous consideration of multiple factors. Prediction of breeding values and estimation of population parameters from variance and covariance components

883 Applied Ruminant Nutrition

Summer. 3(2-2) P:NM: (ANS 313 or ANS 513 or PSL 511) RB: (ANS 483)

Nutritional and metabolic principles for dairy and beef cattle and sheep. Diet formulation. Nutritional assessment and feeding management. Field trips required.

890 Advanced Independent Study

Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course. R: Approval of department; application required.

Investigation of topics of special interest.

898 Master's Research

Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 10 credits in all enrollments for this course. R: Open only to master's students in Animal Science. Ap-

proval of department. Application required. Scholarly project for non-thesis (Plan B) master's degree.

Master's Thesis Research 899

Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 99 credits in all enrollments for this course. R: Open only to master's students in Animal Science. Approval of department.

Master's thesis research.

Selected Topics in Animal Breeding and Genetics

Fall, Spring, Summer. 1 to 2 credits. A student may earn a maximum of 6 credits in all enrollments for this course.

Selected topics of current interest and importance in animal breeding and genetics.

Biology of the Extracellular Matrix

Spring of odd years. 2(2-0) P:NM: (BMB 461 and BMB 462) and (PSL 431 and PSL 432)

Extracellular matrix (ECM) composition and structure. Role of ECM in regulation of cell phenotype. Regulation of ECM remodeling. Biochemical and physiological properties of ECM degrading proteinases and their inhibitors. Integrins and cell signalling. ECM pathologies.

Nutrition: Lipid and Carbohydrate Metabolism

Fall of even years. 3(3-0) Interdepartmental with Human Nutrition and Foods. Administered by Department of Food Science and Human Nutrition.

Regulatory aspects of Ipid and carbohydrate metabolism as influenced by nutritional status.

Protein Nutrition and Metabolism Spring of even years. 3(3-0) Interdepart-

mental with Human Nutrition and Foods. Nutritional and endocrine regulation of protein sy nthesis and degradation, protein quality assessment, protein status, protein-energy malnutrition. Protein metabolism during exercise. Metabolism, digestion, and absorption of amino acids and proteins.

Mineral Nutrition and Metabolism

Fall of even years. 3(3-0) Interdepartmental with Human Nutrition and Foods.

Forms and locations of mineral elements in the body, metabolic functions, deficiencies, and toxicities, interrelationships and quantitative requirements.

938 **Nutrition: Metabolism and Function of** Vitamins

Spring of odd years. 3(3-0) Interdepartmental with Human Nutrition and Foods. Administered by Department of Food Science and Human Nutrition

Regulatory roles of vitamins at cellular and molecu-

Advanced Biometrical Methods for Quantitative Genetics

Fall of even years. 3(3-0) P:NM: (ANS 870 and STT 441)

Advanced biometrical methods applied to inferential problems in animal breeding and genetics. Likelihood and Bayesian methods for estimation of genetic parameters and prediction of genetic merits. Quantitative genetic analysis of discrete, censored, survival, and growth/lactation curve data.

976 Multivariate Methods in Agriculture and

Natural Resources
Spring. 4(4-0) Interdepartmental with Forestry; Fisheries and Wildlife. Administered by Department of Forestry. P:NM: (STT 422 and MTH 314) R: Open only to graduate students in the College of Agriculture and Natural Resources and in the Interdepartmental Graduate Specializations in Ecology

and Evolutionary Biology.

Application of multivariate methods to research problems. Hotelling's Ttest, profile analysis, discriminant analysis, canonical correlation, principal components, principal coordinates, correspondence analysis, and cluster analysis.

Doctoral Dissertation Research Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 99 credits in all enrollments for this course. R: Open only to doctoral students in Animal Science. Approval of department.

Doctoral dissertation research

ANR EDUCATION AND COMMUNICATION SYSTEMS AEE

Department of ANR Education and Communication Systems College of Agriculture and **Natural Resources**

110 Foundations of ANR Communications: Learning and Leadership

Fall. 2(1-2) R: Open only to students in Agriculture and Natural Resources Communications major or Agriscience major or the Agriculture and Natural Resources - No Preference undergraduate program. SA: AEE 101

Basic information systems applied to ANR communications, learning, and leadership. Communications skills, research techniques, learning theory, technology, and personal and professional development.

Applications of ANR Communications: 111

Learning and Leadership Spring. 2(1-2) P:NM: (AEE 110) R: Open only to students in the Agriculture and Natural Resources Communications major or Agriscience major or Agriculture and Natural Resources - No Preference undergraduate program. SA: AEE 101

Application of information systems theory, communications skills, research techniques, learning theory, and technology to agriculture and natural resource problems. Issue identification, critical thinking, problem solving, team building, and working with diversity.

Michigan's Agricultural and Natural 202 Resources Heritage

Fall. 2(2-0) Interdepartmental with Agriculture and Natural Resources. Administered by Agriculture and Natural Resources. P:M: Completion of Tier I writing requirement.

Michigan's historical agricultural and natural esources. Orientation to sources for research and learning. Self-directed study integrating agricultural and natural resources heritage to family, community and careers
