

STATISTICS AND PROBABILITY

STT

Department of Statistics and Probability College of Natural Science

200 Statistical Methods

Fall, Spring, Summer. 3(4-0) P: (MTH 103 or MTH 110 or MTH 116 or MTH 124 or MTH 132 or LB 118) or designated score on Mathematics Placement test Not open to students with credit in STT 201 or STT 315 or STT 421.

Data analysis, probability models, random variables, estimation, tests of hypotheses, confidence intervals, and simple linear regression.

201 Statistical Methods

Fall, Spring, Summer. 4(3-2) P: (MTH 103 or MTH 110 or MTH 116 or MTH 124 or MTH 132 or LB 118) or designated score on Mathematics Placement test Not open to students with credit in STT 200 or STT 315 or STT 421.

Probability and statistics with computer applications. Data analysis, probability models, random variables, tests of hypotheses, confidence intervals, simple linear regression. Weekly lab using statistical software.

224 Introduction to Probability and Statistics for Ecologists

Spring. 3(2-2) Interdepartmental with Fisheries and Wildlife. Administered by Statistics and Probability. P: MTH 103 or MTH 116 or (MTH 124 or concurrently) or (MTH 132 or concurrently) or (MTH 152H or concurrently) or (LB 118 or concurrently) RB: BS 110 or BS 148H or LB 144 SA: FW 324 Not open to students with credit in STT 231.

Probability and statistics with computer applications for the analysis, interpretation and presentation of ecological data. Data analysis, probability models, random variables, estimation, confidence intervals, test of hypotheses, and simple linear regression with applications to ecology.

231 Statistics for Scientists

Fall, Spring, Summer. 3(3-0) P: MTH 124 or MTH 132 or MTH 152H or LB 118 R: Open to students in the College of Natural Science and open to students in the Lyman Briggs College. SA: STT 331

Calculus-based course in probability and statistics. Probability models, and random variables. Estimation, confidence intervals, tests of hypotheses, and simple linear regression with applications in sciences.

290 Topics in Statistics and Probability

Fall, Spring, Summer. 1 to 3 credits. RB: MTH 103 R: Approval of department.

Individualized study of selected topics.

315 Introduction to Probability and Statistics for Business

Fall, Spring, Summer. 3(4-0) P: MTH 124 or MTH 132 or MTH 152H or LB 118 Not open to students with credit in STT 200 or STT 201 or STT 421.

A first course in probability and statistics primarily for business majors. Data analysis, probability models, random variables, confidence intervals, and tests of hypotheses with business applications.

317 Quantitative Business Research Methods

Fall, Spring, Summer. 3(3-1) Interdepartmental with Marketing. Administered by Marketing. P: STT 315 R: Open to juniors or seniors in the Eli Broad College of Business and The Eli Broad Graduate School of Management and not open to undergraduate students in the School of Hospitality Business. SA: MSC 317

Application of statistical techniques, including forecasting, to business decision making. Includes applications of linear regression and correlation, analysis of variance, selected non-parametric tests, time series, and index numbers.

351 Probability and Statistics for Engineering

Fall, Spring, Summer. 3(3-0) P: MTH 234 or MTH 254H or LB 220 Not open to students with credit in STT 430.

Probability models and random variables. Estimation, confidence intervals, tests of hypotheses, simple linear regression. Applications to engineering.

371 Statistical Biology

Spring. 3(3-0) Interdepartmental with Mathematics. Administered by Statistics and Probability. P: (MTH 132 or LB 118 or approval of department) and (STT 231 or STT 351 or STT 421 or STT 441 or STT 464 or approval of department) and (BS 110 or BS 111 or BS 148H or BS 149H or LB 144 or LB 145 or LB 148H or LB 149H)

Probability models in biological systems. Design and analysis of biological experiments including ANOVA models. Multiple testing. Classification and clustering for genomic and proteomic data. Computational software packages. Internet-based query systems.

421 Statistics I

Fall, Spring, Summer. 3(3-0) P: MTH 103 or MTH 110 or MTH 116 Not open to students with credit in STT 200 or STT 201 or STT 315.

Basic probability, random variables, and common distributions. Estimation and tests for one-, two-, and paired sample problems. Introduction to simple linear regression and correlation, one-way ANOVA.

422 Statistics II

Fall, Spring, Summer. 3(3-0) RB: STT 421

Not open to students with credit in STT 464. Goodness of fit and other non-parametric methods. Linear models including multiple regression and ANOVA for simple experimental designs.

430 Introduction to Probability and Statistics

Fall, Spring, Summer. 3(3-0) RB: MTH 234 or concurrently Not open to students with credit in STT 351.

Calculus-based probability and statistics with applications. Discrete and continuous random variables and their expectations. Point and interval estimation, tests of hypotheses, and simple linear regression.

441 Probability and Statistics I: Probability

Fall, Spring, Summer. 3(3-0) RB: MTH 234 or MTH 254H or LB 220

Probability models and basic statistics at an intermediate mathematical level. Discrete, continuous, univariate, and multivariate distributions. Random variables. Normal approximation. Sampling distributions, parameter estimation, and elementary tests of hypotheses.

442 Probability and Statistics II: Statistics

Spring. 3(3-0) RB: STT 441 and (MTH 309 or MTH 314 or MTH 415)

Estimation, testing hypotheses and simple and multiple regression analysis. Time series: ARMA (Auto Regressive Moving Average) and ARIMA (Auto Regressive Integrated Moving Average) models, data analysis and forecasting.

455 Actuarial Models

Spring. 3(3-0) Interdepartmental with Mathematics. Administered by Statistics and Probability. RB: STT 441 and MTH 360

Stochastic models used in insurance. Survival distributions, life insurance, life annuities, benefit premiums, benefit reserves, and analysis of benefit reserves.

461 Computations in Probability and Statistics

Spring. 3(3-0) RB: CSE 131 and STT 441 and (MTH 309 or MTH 314)

Computer algorithms for evaluation, simulation and visualization. Sampling and prescribed distributions. Robustness and error analysis of procedures used by statistical packages. Graphics for data display, computation of probabilities and percentiles.

464 Statistics for Biologists

Fall. 3(3-0) Interdepartmental with Animal Science and Crop and Soil Sciences. Administered by Statistics and Probability. RB: STT 421

Biological random variables. Estimation of population parameters. Testing hypotheses. Linear correlation and regression. Analyses of counted and measured data to compare several biological groups including contingency tables and analysis of variance.

471 Statistics for Quality and Productivity

Fall of even years. 3(3-0) RB: STT 351 or STT 422 or STT 442

Scientific context of quality: Box, Deming, Taguchi. Graphical techniques, control charts. Design of experiments: factorials and fractional factorials, confounding and aliasing. Engineering parameter design through experimentation.

481 Issues in Statistical Practice

Spring. 1(1-0) P: Completion of Tier I writing requirement. R: Open only to seniors in the Department of Statistics.

Selected readings and projects illustrating special problems encountered by professional statisticians in their roles as consultants, educators, and analysts.

490 Directed Study of Statistical Problems

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 9 credits in all enrollments for this course. R: Open only to juniors or seniors in the Department of Mathematics or Department of Statistics and Probability. Approval of department.

Individualized study of selected topics.

801 Design of Experiments

Fall of even years. 3(3-0) RB: STT 422 or STT 442 or STT 471

Blocking and randomization. Split-plot, latin square and factorial designs. Fractional factorial designs, aliasing and confounding of effects. Mixture and central composite designs and response surface exploration. Clinical trials.

Statistics and Probability—STT

- 808 Biostatistics I**
Fall. 3(3-0) Interdepartmental with Epidemiology. Administered by Epidemiology. RB: College-level algebra. R: Open to masters students or doctoral students in the Epidemiology major or approval of department. SA: STT 425
Applications of probability and statistics in the applied health sciences. Probability distributions, estimation and tests for one-, two-, and paired samples, linear regression, correlation, and ANOVA. Use of statistical software. Critical appraisal of statistical methods in the biomedical literature.
- 809 Biostatistics II**
Spring. 3(3-0) Interdepartmental with Epidemiology. Administered by Epidemiology. P: EPI 808 RB: MTH 103 or MTH 110 or MTH 116 R: Open to masters students or doctoral students in the Epidemiology major or approval of department. SA: STT 426
Analysis of categorical data in epidemiologic studies. Contingency tables and logistic regression.
- 814 Advanced Statistics for Biologists**
Spring. 4(3-2) Interdepartmental with Animal Science and Crop and Soil Sciences. Administered by Statistics and Probability. RB: STT 464
Concepts of reducing experimental error for biological and agricultural research. Covariance, randomized block designs, latin squares, split plots, repeated-measures designs, regression applications, and response surface designs. Analyses using statistical software.
- 820A Econometrics IA**
Fall. 3(3-0) Interdepartmental with Economics. Administered by Economics. R: Open only to doctoral students in the Economics major or the Department of Agricultural Economics or the Business Administration major or approval of department.
Statistical tools for econometrics. Applications of statistical tools, including probability distributions, estimation, hypothesis testing, and maximum likelihood to econometric problems.
- 821A Cross Section and Panel Data Econometrics I**
Fall. 3(3-0) Interdepartmental with Agricultural Economics and Economics and Finance. Administered by Economics. P: EC 820B SA: EC 821
Analyses of systems of equations, panel data models, instrumental variables and generalized method of moments, M-estimation, quantile regression, maximum likelihood estimation, binary and multinomial response models, Tobit and two-part models, and other selected topics.
- 821B Cross Section and Panel Data Econometrics II**
Spring. 3(3-0) Interdepartmental with Agricultural Economics and Economics and Finance. Administered by Economics.
Analyses of quasi-maximum likelihood estimation, count data models, fractional response models, duration models, sample selection and attrition, stratified sampling, estimating treatment effects, stochastic frontier models, and other advanced topics.
- 822A Time Series Econometrics I**
Fall. 3(3-0) Interdepartmental with Agricultural Economics and Economics and Finance. Administered by Economics. P: EC 820B SA: EC 822
Analyses of time series regression, stationary time series analysis, ARMA models, Wold decomposition, spectral analysis, vector autoregressions, generalized method of moments, functional central limit theorem, nonstationary time series, unit root processes, cointegration, and other advanced topics.
- 822B Time Series Econometrics II**
Spring. 3(3-0) Interdepartmental with Agricultural Economics and Economics and Finance. Administered by Economics. P: EC 822A
Analyses of multivariate time series, time series volatility models, long memory, nonlinear time series models, and other advanced topics.
- 825 Sample Surveys**
Fall. 3(3-0) RB: STT 422 or STT 442 or STT 862
Application of statistical sampling theory to survey designs. Simple random, stratified, and systematic samples. Sub-sampling, double sampling. Ratio and regression estimators.
- 843 Multivariate Analysis**
Spring of even years. 3(3-0) RB: STT 442 or STT 862 Not open to students with credit in FW 850.
Multivariate normal distribution, tests of hypotheses on means, multivariate analysis of variance. Discriminant analysis. Principal components. Factor analysis. Analysis of frequency data.
- 844 Time Series Analysis**
Spring of odd years. 3(3-0) RB: STT 442 or STT 862
Stationary time series. Autocorrelation and spectra. ARMA and ARIMA processes: estimation and forecasting. Seasonal ARIMA models. Identification and diagnostic techniques. Multivariate time series. Time series software.
- 847 Analysis of Survival Data**
Spring of odd years. 3(3-0) Interdepartmental with Epidemiology. Administered by Statistics and Probability. RB: STT 422 or STT 442 or STT 862
Analysis of lifetime data. Estimation of survival functions for parametric and nonparametric models. Censored data. The Cox proportional hazards model. Accelerated failure time models. Frailty models. Use of statistical software packages.
- 850 Applied Multivariate Statistical Methods**
Spring of even years. 4(3-2) Interdepartmental with Fisheries and Wildlife. Administered by Fisheries and Wildlife. RB: (STT 422 or concurrently) and MTH 314 SA: FOR 976
Application of multivariate methods to research problems. Hotelling's T-test, profile analysis, discriminant analysis, canonical correlation, principal components, principal coordinates, correspondence analysis, and cluster analysis.
- 855 Statistical Genetics**
Fall of odd years. 3(3-0) RB: STT 442 or STT 862
Probabilistic and statistical methods for genetic linkage and association studies. Quantitative trait locus mapping.
- 861 Theory of Probability and Statistics I**
Fall. 3(3-0) RB: MTH 320 or concurrently
Discrete and continuous random variables and vectors. Important probability models. Inequalities and limit laws. Sampling distributions and functions of random vectors. Statistical inference.
- 862 Theory of Probability and Statistics II**
Spring. 3(3-0) RB: STT 861 and (MTH 415 or concurrently)
Statistical inference: sufficiency, likelihood, estimation, and tests of hypotheses in parametric and nonparametric cases. Linear models, goodness of fit, and other topics.
- 863 Applied Statistics Methods I**
Fall. 3(3-0) RB: (STT 442 or STT 862) and (MTH 415 or concurrently) SA: STT 841
Application of regression models including simple and multiple regression, model diagnostics, model selection, one- and two-way analysis of variance, mixed effects models, randomized block designs, and logistic regression.
- 864 Applied Statistical Methods II**
Spring of odd years. 3(3-0) RB: STT 863
Generalized linear models, loglinear models, hierarchical models, repeated measures, discriminant analysis and classification, clustering, regression, classification trees, selected nonparametric methods.
- 865 Modern Statistical Methods**
Spring of even years. 3(3-0) RB: STT 863
Modern statistical methods. Applicability and computer implementation. Resampling methods, including the bootstrap. Markov chain Monte Carlo methods. Survival analysis. Nonparametric curve estimation.
- 866 Spatial Data Analysis**
Fall. 4(3-2) Interdepartmental with Geography. Administered by Geography. RB: (GEO 363 or STT 421 or STT 430) or equivalent quantitative methods courses. SA: GEO 466
Theory and techniques for statistical analysis of point patterns, spatially continuous data, and data in spatial zones.
- 871 Theory of Statistics I**
Fall. 4(3-2) RB: (MTH 828 or concurrently) and (STT 881 or concurrently)
Empirical distributions, quantiles, Glivenko-Cantelli Theorem. Important distributions and families. Convergences, Slutsky Theorem, asymptotics of differentiable functions. Basic concepts of decision theory. Confidence sets. Some basic statistical methods.
- 872 Theory of Statistics II**
Spring. 3(3-0) RB: STT 871 and (STT 882 or concurrently)
Theory of Neyman Pearson tests and extensions. Convex loss estimation, best unbiased estimates, sufficient statistics, information lower bounds. Extensive application to linear models. LAN families and applications to estimation and tests.
- 881 Theory of Probability I**
Fall. 3(3-0) RB: MTH 828 or concurrently
Measures and their extensions, integration, and convergence theorems. Product measures, Lebesgue decomposition, transition probabilities, Kolmogorov consistency theorem. Independence. Classical limit theorems for partial sums.

- 882 Theory of Probability II**
 Spring. 3(3-0) RB: STT 881
 Conditional expectation, martingales, stationary processes. Brownian motion, convergence in distribution, and the invariance principle.
- 886 Stochastic Processes and Applications**
 Fall. 3(3-0) RB: STT 441 or STT 861
 Markov chains and their applications in both discrete and continuous time, including classification of states, recurrence, limiting probabilities. Queuing theory, Poisson process and renewal theory.
- 888 Stochastic Models in Finance**
 Spring of even years. 3(3-0) RB: STT 441 or STT 861 SA: STT 887
 Stochastic models used in pricing financial derivatives. Discrete-time models. Brownian motion. Stochastic integrals and Ito's formula. Basic Black-Scholes model. Risk neutral distribution. European and American options. Exotic options. Interest rate market, futures, and interest rate options.
- 890 Statistical Problems**
 Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 24 credits in all enrollments for this course. R: Approval of department.
 Individualized study on selected problems.
- 899 Master's Thesis Research**
 Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 36 credits in all enrollments for this course. R: Approval of department.
 Master's thesis research.
- 914 Applied Regression Models in Business Research**
 Spring. 3(3-0) Interdepartmental with Management. Administered by Management. RB: (STT 430 or STT 441) or or equivalent R: Open only to Ph.D. students in the College of Business or approval of department.
 Seminar on design and analysis of regression-based statistical models. Modeling issues arising in business research.
- 920 Advanced Methods in Epidemiology and Applied Statistics**
 Spring of even years. 3(3-0) Interdepartmental with Epidemiology. Administered by Epidemiology. P: EPI 826
 Pattern recognition and cluster analysis, longitudinal data analysis, path analysis, repeated measures and time-series analysis.
- 953 Asymptotic Theory**
 Fall of even years. 3(3-0) RB: STT 872
 Asymptotics of M- and R- estimators. Asymptotically efficient and adaptive procedures.
- 954 Semi-Nonparametric Inference**
 Fall of odd years. 3(3-0) RB: STT 872
 Robust procedures in regression and time series settings, nonparametric curve estimation, survival analysis in non- and semi-parametric models.
- 961 Convergence of Measures and Stochastic Processes**
 Spring of odd years. 3(3-0) RB: STT 882
 Convergence of measures on metric spaces. Prohorov's theorem. Function spaces with the uniform and Skorokhod metric. Empirical processes. Weak convergence of Martingales. Applications.
- 964 Stochastic Analysis**
 Spring of even years. 3(3-0) RB: STT 882
 Stochastic integrals and semi-martingales, Ito formula, stochastic differential equations. Applications.
- 990 Problems in Statistics and Probability**
 Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: STT 872 R: Approval of department.
 Individual study on an advanced topic in statistics or probability.
- 996 Advanced Topics in Probability**
 Fall, Spring, Summer. 3(3-0) A student may earn a maximum of 15 credits in all enrollments for this course. RB: STT 882 R: Approval of department.
 Current topics in probability.
- 997 Advanced Topics in Statistics**
 Fall, Spring, Summer. 3(3-0) A student may earn a maximum of 15 credits in all enrollments for this course. RB: STT 872 R: Approval of department.
 Topics selected from non- and semi parametric statistics, multivariate analysis, time series analysis, Bayesian statistics, regression and kernel estimation, and other topics in advanced statistics.
- 999 Doctoral Dissertation Research**
 Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 120 credits in all enrollments for this course. R: Approval of department.
 Doctoral dissertation research.
