PHARMACOLOGY AND TOXICOLOGY

PHM

Department of Pharmacology and Toxicology **College of Veterinary Medicine**

340

Principles of Drug Action Summer. 1(1-0) P: CEM 251 or CEM 252 or PSL 250 or PSL 310 RB: Chemistry and/or Physiology background recommended. R: Open to undergraduate students or lifelong graduate students or lifelong undergraduate students. Not open to students with credit in PHM 350

Factors influencing drug action. Absorption, distribution, and elimination of drugs. Factors controlling intensity, selectivity of drug action, and nature of drug action. Mismatches of drug presence and drug action including receptor effector coupling mechanisms and mechanisms of tolerance to drug action. Offered first half of semester.

Introductory Human Pharmacology

Fall, Spring, Summer. 3(3-0) P: (PSL 250 or PSL 310) or (PSL 431 and PSL 432) R: Not open to freshmen.

General principles of pharmacology. Central and autonomic nervous systems. Cardiovascular and renal drugs. Chemotherapy. Anti-infective drugs and endocrine agents.

431 **Pharmacology of Drug Addiction**

Fall. 3(3-0) RB: Zoology or Human Biology or Psychology or Biochemistry or Physiolo-

Introduction to pharmacology and neuropharmacology. Understanding of the biological basis for drug abuse and addiction.

450 Introduction to Chemical Toxicology

Spring. 3(3-0) P: (BS 110 or LBS 144) and (BS 111 or LBS 145 or BS 111) and CEM 251 R: Not open to freshmen or sopho-

Mammalian toxicology. Disposition of chemicals in the body, detoxication, elimination, and mechanisms of toxicity in major organ systems. Selected toxic agents.

480 **Special Problems**

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 9 credits in all enrollments for this course. R: Approval of department.

Individual work on selected research problems.

552 Veterinary Pharmacology I: Principles and Neuropharmacology

Spring. 2(2-0) R: Open to graduateprofessional students in the College of Veterinary Medicine. SA: PHM 556

Basic principles of pharmacology and mechanisms of action of drugs used to affect nervous system

553 Veterinary Pharmacology II: Systems and Infectious Diseases

Fall. 3(3-0) RB: Completion of Year 1 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PHM 556

Principles of pharmacology of infectious disease and specific organ systems, including mechanisms of action and adverse effects of drugs.

557 **Veterinary Toxicology**

Fall. 2(2-0) RB: Completion of Year 1 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.

Determinants of toxic responses, analytical toxicology, genetic toxicology, and toxin management. Diagnosis, prevention, and treatment of common

563 Medical Pharmacology

Summer. 3(3-0) R: Open only to graduate-professional students in the colleges of Human and Osteopathic Medicine.

General principles of pharmacology and selected drugs. Rational drug therapy.

Case Studies in Clinical Pharmacology

Spring. 2(2-0) P: PHM 563 RB: Completion of Year 2 in the College of Osteopathic Medicine or College of Human Medicine. R: Open to graduate-professional students in the College of Osteopathic Medicine or in the College of Human Medicine or approval of department.

Selected case studies emphasizing clinical applications of pharmacological principles. Evaluation of new drugs, drug advertising, and adverse drug reactions.

658 Research Problems in Pharmacology or Toxicology

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: Completion of Semester 4 of the graduate-professional program in the College of Veterinary Medicine. R: Approval of department.

Selected research problems in pharmacology or toxicology.

Molecular and Developmental 804 Neurobiology

Fall. 3(3-0) Interdepartmental with Neuroscience and Pathobiology and Diagnostic Investigation and Psychology and Zoology. Administered by Neuroscience. RB: Bachelor's degree in a Biological Science or Psychology. R: Open to graduate students in Neuroscience major.

Nervous system specific gene transcription and translation. Maturation, degeneration, plasticity, and repair in the nervous system.

Advanced Neuroscience Techniques Laboratory Spring. 3(0-9) Interdepartmental with Neu-

roscience and Physical Medicine and Rehabilitation and Psychology and Radiology. Administered by Neuroscience. RB: PHM 827 R: Open only to doctoral students in the Neuroscience major.

Methods and underlying principles of neuroscience

810 **Synaptic Transmission**

Spring of odd years. 3(3-0) R: Open to graduate students or approval of department.

Chemical and electrical aspects of nerve impulse transmission at synaptic and neuroeffector junctions. Influence of drugs.

Cardiovascular Pharmacology

Spring of even years. 3(3-0) R: Open to graduate students or approval of department.

Cardiovascular signal transduction and control in normal and pathophysiologic states.

816 Integrative Toxicology: Mechanisms, Pathology and Regulation

Fall of odd years. 3(3-0) Interdepartmental with Animal Science and Biochemistry and Molecular Biology and Pathobiology and Diagnostic Investigation. Administered by Pharmacology and Toxicology. P: PHM 819

Biochemical, molecular, and physiological mechanisms of toxicology. Functional and pathological responses of major organ systems to chemical insult. Mechanisms of mutagenesis, carcinogenesis, and reproductive toxicology. Concepts in risk and safety assessment.

Principles of Drug-Tissue Interactions 819

Fall. Spring. Summer. 1 to 2 credits. A student may earn a maximum of 3 credits in all enrollments for this course. R: Open to graduate students or lifelong graduate students.

General principles relevant to the interaction of chemicals with biological systems. Topics include pharmacokinetics and/or pharmacodynamics.

Cellular, Molecular and Integrated 820 Systems Pharmacology and Toxicology

Fall. 4(4-0) P: BMB 801 and BMB 802 and PHM 827 and PSL 828 R: Open to graduate students or approval of department.

Comprehensive overview of the cellular and molecular mechanisms of drug and chemical actions on the major organ systems of humans and other mam-

Physiology and Pharmacology of 827 **Excitable Cells**

Fall. 4(4-0) Interdepartmental with Neuroscience and Physiology and Zoology. Administered by Pharmacology and Toxicology. RB: PSL 431 or PSL 432 or BMB 401 or BMB 461 or ZOL 402

Function of neurons and muscle at the cellular level: membrane biophysics and potentials, synaptic transmission, sensory nervous system function.

Neuropharmacology 829

Fall. 2(2-0) P: PHM 819 RB: Some background in physiology. R: Open to master's students or doctoral students or lifelong graduate students.

Description of targets in the mammalian central nervous system of clinically useful drugs and the mechanism of action, clinical use, and side effects of those drugs. Offered first ten weeks of semester.

830 **Experimental Design and Data Analysis**

Fall, Summer. 3(3-0) RB: Undergraduate degree in biology, chemistry or related field.

Practical application of statistical principles to the design of experiments and analysis of experimental data in pharmacology, toxicology, and related biomedical sciences.

831 **Endocrine Pharmacology**

Fall. 2(2-0) Not open to students with credit in PHM 820.

Physiology, pharmacology, and toxicology of the endocrine system. Endocrine diseases, pharmacological intervention, hormone therapy, endocrine disruptors, role of hormones in normal metabolism and metabolic disorders, and animal models of endocrine and metabolic disorders.

Pharmacology and Toxicology—PHM

832 **Applied Integrative Pharmacology** Laboratory

Summer. 4(2-4) P: PHM 819 and PHM 830 RB: Undergrad degree in biology, chemistry or related field. Prior biomedical lab experience helpful. R: Not open to undergraduate students. Approval of department.

Integrative and organ-level pharmacology. Regulatory issues in the use of experimental animals, animal models of diseases, animal and tissue preparation for whole-animal and organ-level pharmacology experiments, experimental design, data collection, data analysis, and data interpretation.

833 **Gastro-Intestinal and Liver**

Pharmacology Spring. 2(2-0) RB: (PHM 350 or PHM 819) or Some pharmacology background.

Specific drugs and their mechanisms of action in the treatment of gastrointestinal and liver diseases. Toxic effects of drugs and other xenobiotics on the gastrointestinal tract, including the liver.

834 Respiratory Pharmacology

Spring. 2(2-0) RB: Some prior course work in physiology or pharmacology.

Integrative study of drugs, their mechanism of action, and their side effects in the treatment of major diseases and pathologies of the respiratory system.

839 **Systems Neuroscience**

Spring. 4(4-0) Interdepartmental with Human Anatomy and Neuroscience and Physiology and Psychology and Zoology. Administered by Neuroscience. R: Open only to graduate students in the Colleges of Human Medicine, Osteopathic Medicine, Agriculture and Natural Resources, Natural Science, Social Science, and Veterinary Medicine. SA: ANT 839

Anatomy, pharmacology, and physiology of multicellular neural systems. Sensory, motor, autonomic, and chemo-regulatory systems in vertebrate brains.

840

Safety Pharmacology Spring. 2(2-0) RB: Undergraduate degree in biology, chemistry or related area. Prior coursework in physiology useful.

Systems study of current experimental models, risk assessment, and regulatory guidelines for evaluating drug candidates for pharmacologic effects unrelated to therapeutic effects.

850 **Communications for Biomedical** Researchers

Summer. 2(2-0)

Effective research and business communication, including written and verbal skills for a variety of audiences and purposes.

Intellectual Property and Patent Law for **Biomedical Sciences**

Fall. 2(2-0) RB: Strong reading and writing skills helpful.

Fundamentals of intellectual property and patent law encountered by biomedical scientists, including issues of prevention, patent prosecution, and enforcement of patents in a litigation setting.

854 Leadership and Team-Building for Biomedical Research

Spring. 2(2-0) RB: Experience supervising others and/or participation in workplace teams is strongly suggested. Not open to students with credit in CMBA 804 or CMBA 805 or CMBA 806 or CMBA 832.

Evaluation of current leadership methods. Models of leadership. Practice of specific skills and development of a plan to increase their influence and extend learning beyond the class.

855 The Business of Biomedical Research Organizations

Spring. 2(2-0)

Theories, methods, terminology, and culture of business as used in biomedical research and development environments.

Project Management

Summer. 2(2-0)

Formal project management culture, principles, knowledge areas, and terminology. Specific tools and techniques including work breakdown structure, earned value analysis, risk management, and quality control for managing scientific research. Offered first ten weeks of semester.

858 **Drug Development Process**

Fall. 3(3-0) RB: Some experience working with laboratory or clinical research projects.

Project management standards and best practices in drug development process, including clinical trials.

Research Rotation

Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 12 credits in all enrollments for this course. RB: Open only to first year graduate students in Pharmacology and Toxicology. R: Approval of department.

Individual work on selected research problems.

895 **Applied Project in Integrative** Pharmacology

Fall, Spring, Summer. 3 to 6 credits. A student may earn a maximum of 6 credits in all enrollments for this course. P: PHM 819 and PHM 830 and PHM 832 RB: All coursework for the MS in Integrative Pharmacology should be completed prior to beginning the Applied Project unless there is Departmental approval to complete final courses concurrently with the Applied Project. R: Open to masters students in the Department of Pharmacology and Toxicology. Approval of department.

An on-site project that addresses a research, theoretical, or applied problem in whole-animal or organ level pharmacology, in cooperation with the stu-dents' employer or laboratory partner.

Master's Thesis Research 899

Fall, Spring, Summer. 1 to 8 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Open only to graduate students in the Department of Pharmacology and Toxicology. Approval of department.

Master's thesis research.

910 Seminar

Fall, Spring. 1(1-0) A student may earn a maximum of 3 credits in all enrollments for this course. R: Open only to graduate students. Approval of department.

Discussion of recent topics in pharmacology and toxicology by faculty or invited outside speakers. Students research reports.

980 **Problems**

Fall, Spring, Summer. 2 to 5 credits. A student may earn a maximum of 20 credits in all enrollments for this course. R: Open to doctoral students. Approval of department.

Limited work in selected research projects.

Doctoral Dissertation Research 999

Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 70 credits in all enrollments for this course. R: Open to graduate students in the Department of Pharmacology and Toxicology. Approval of department.

Doctoral dissertation research.
