HUMAN NUTRITION HNF AND FOODS

Department of Food Science and Human Nutrition **College of Agriculture** and Natural Resources

150 Introduction to Human Nutrition

Fall, Spring, Summer. 3(3-0) Nutrition needs in life stages from a human ecological perspective. Domestic and international factors affecting the availability of a safe, nutritious food supply. Relationships of food choices to health and disease

260 **Principles of Human Nutrition**

Fall, Spring. 3(3-0) P: BS 161 or BS 181H or LB 145 or BMB 200 or PSL 250 SA: HNF 311

Identification, function and food sources of nutrients required by humans. Normal metabolism. Effects of deficiencies or excesses of specific nutrients and food components on metabolism and health.

300 **Experimental Approaches to Foods**

Fall, Spring. 4(2-4) P: Completion of Tier I writing requirement. RB: (CEM 143) R: Open to only to juniors or seniors in the Department of Food Science and Human Nutrition.

Effects of preparation methods and ingredient substitutions on chemical and physical properties of food constituents. Effects of changes in chemical and physical properties on functional and sensory attributes of foods.

320 Basic Skills in Dietetic Practice Spring. 3(4-0) P: HNF 150 or HNF 260 R: Open to sophomores or juniors or seniors in the Dietetics major. SA: HNF 220

Scope of the profession of dietetics. Foundation knowledge and skills for dietetics. Food patterns for health and disease management.

Community Nutrition 375

Fall, Summer. 2(2-0) P: HNF 150 or HNF 311 R: Open to sophomores or juniors or seniors.

Guidelines for dietary and anthropometric components of nutritional status, including health surveys. Agencies and programs that address food and nutritional needs of target populations throughout the life cycle.

377 **Applied Community Nutrition**

Fall. 4(3-2) P: HNF 320 R: Open to juniors or seniors in the Dietetics major.

Skill development in dietary and anthropometric assessment. Nutrition care process. Evaluation of dietary behavior change. Health policy. Assessment, intervention and evaluation of food and nutrition programs

400 Art and Science of Food Preparation

Spring. 2(3-2) P: HNF 300 R: Open to seniors in the Dietetics major.

Art and science of food preparation in relation to cost, health, dietary modification, and historical, regional, ethnic, and religious customs. Product evaluation using sensory techniques. Offered half of semester.

406 Sociocultural Aspects of Food

Spring. 3(3-0) P: (HNF 150 or concurrently) or (HNF 260 or concurrently) RB: ISS course or concurrently. R: Open to juniors or seniors.

Factors impacting food consumption from a human ecological perspective. International and national food consumption patterns. Geographic, political, and economic aspects of food consumption. Food availability and distribution. Family structure, taboos, religion, and food-related health problems.

Foodservice Operations 440

Fall. 3(3-0) P: (HNF 150 or HNF 260) and (FSC 342 or concurrently) R: Open to juniors or seniors in the Dietetics major.

Principles, processes and control strategies in foodservice operations. Menu planning, procurement, and on-premise storage and issuance. Purchasing, ethics, production, safety and sanitation.

444 **Food and Nutrition Services** Management

Fall, Spring. 3(2-2) P: HNF 440 or concurrently RB: CSE 101 R: Open to juniors or seniors in the Dietetics major.

Human resources, budget and financial resources. Technology and marketing in food and nutrition services management. Utilizing prototype computer software for procurement, receiving, inventory management, recipe adjustment, nutrient analysis, budgets and accounting.

445 **Foodservice Management Experience**

Fall, Spring. 2 credits. P: HNF 440 or con-currently RB: MMG 205 R: Open only to seniors in the Dietetics or Nutritional Sciences major or graduate students in the Human Nutrition major. Approval of department.

Receipt, storage, preparation and service of foods. Safety and sanitation. Design, layout, and care of equipment. Costing. Meal tickets required. Offered half of semester.

453 Nutrition and Human Development

Spring. 3(3-0) P: (HNF 375 or HNF 377) and ((PSL 250 or concurrently) or PSL 310 or PSL 431) R: Open to juniors or seniors in the Dietetics major or in the Nutritional Sciences major or in the Nutritional Sciences minor. SA: HNF 376

Role of nutrients in anatomical, physiological, and biochemical processes as related to human growth and development. Nutrition throughout the life cycle. Nutritional assessment integrating the nutrition care process and age specific programs.

456 Eating Disorders

Summer. 3(3-0) P: HNF 150 or HNF 260 Treatment and prevention of anorexia nervosa, bulimia nervosa, and other eating disorders.

457 Sports and Cardiovascular Nutrition

Spring. 3(3-0) Interdepartmental with Kinesiology. Administered by Human Nutrition and Foods. P: (HNF 150 or HNF 260) and (PSL 250 or PSL 431) and (BMB 200 or BMB 401 or BMB 461 or KIN 310)

Nutrition for optimizing sport training, recovery, and performance. Power, intermittent, and endurance sports. Overall health with an emphasis on cardiovascular health

461 Advanced Human Nutrition:

Carbohydrates, Lipids and Proteins Fall. 3(3-0) P: (BMB 200 or BMB 401 or BMB 461) and (PSL 250 or PSL 310 or PSL 432) SA: HNF 460

Energetics and metabolism of carbohydrates, lipids, and proteins as related to dietary requirements and disease processes in humans. Recommended dietary allowances. Food sources of nutrients.

462 Advanced Human Nutrition: Vitamins

and Minerals

Fall. 3(3-0) P: HNF 461 or concurrently SA: HNF 460

Metabolism of vitamins and minerals in relation to dietary requirements and disease processes in humans. Food sources of nutrients. Nutrient interrelationships. Factors affecting bioavailability and stability of nutrients.

463 **Nutritional Sciences Laboratory**

Fall. 3(1-4) P: (CEM 255 and (HNF 461 or concurrently) and (HNF 462 or concurrently)) and completion of Tier I writing requirement

Principles and methods used in nutrient analyses and nutritional assessment.

464 Nutrition in the Prevention and

Treatment of Disease Spring. 4(4-0) P: (HNF 461 and HNF 462) and (BMB 401 or BMB 461) and Completion of Tier I Writing Requirement

Nutrition and relationship to health and disease using a basic research approach.

471

Medical Nutrition Therapy I Fall. 4(3-2) P: (((HNF 461 or concurrently) and (HNF 462 or concurrently)) and completion of Tier I writing requirement) and (PSL 250 or PSL 310 or PSL 431) and (PSL 432 or ANTR 350) R: Open to juniors or seniors. SA: HNF 470

Anatomical, physiological and biochemical changes associated with diabetes, gastrointestinal, cardiovascular and bariatric conditions. Nutrition assessment, nutrition diagnoses, interventions, monitoring and evaluation, documentation and quality improvement as guided by American Dietetic Association's Nutrition Care Process. Interactions of diet therapies with other therapies including pharmacologic and complementary and alternative medicine.

Medical Nutrition Therapy II 472

Spring. 4(3-2) P: HNF 471 R: Open to juniors or seniors. SA: HNF 470

Anatomical, physiological and biochemical changes associated with hematologic, musculoskeletal, renal, respiratory, hepatobiliary, cancer, HIV/AIDS, metabolic stress and multiple organ failure. Nutrition assessment, nutrition diagnoses, interventions, monitoring and evaluation, documentation and quality improvement as guided by American Dietetic Association's Nutrition Care Process. Interactions of diet therapies with other therapies including pharmacologic and complementary and alternative medicine.

Community Nutrition Applications 475

Spring. 1(0-2) P: HNF 375 R: Open to juniors or seniors.

Practice and evaluation of dietary and anthropometric nutritional assessment. Apply communication, advocacy and problem solving skills by identifying and addressing the nutrition needs and wants of a target population.

480 Human Nutrition Research Methods

Spring. 3(1-6) P: (HNF 461 and HNF 462 and HNF 463) and completion of Tier I writing requirement

Issues and techniques involved in nutrition research with humans and animals. Independent research and public presentation of projects.

490 Independent Study

Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 10 credits in all enrollments for this course. R: Open only to juniors or seniors. Approval of department.

Individual study of selected topics in foods, foodservice management or nutrition.

490H Honors Independent Study

Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 10 credits in all enrollments for this course. R: Open to juniors or seniors. Open only to honors students. Approval of department.

Individual study of selected topics in foods, foodservice management or nutrition.

491 Topics in Human Nutrition

Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 10 credits in all enrollments for this course. P: HNF 150 or HNF 311

Selected topics of current interest in human nutrition

494 Practicum

Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 10 credits in all enrollments for this course. R: Open only to majors in the Department of Food Science and Human Nutrition. Approval of department.

Professional experience in selected settings and organizations under faculty supervision.

820 Advanced Biochemical Nutrition

Fall. 3(3-0) RB: Undergraduate biochemistry and upper-level undergraduate nutrition Biochemical aspects of advanced human nutrition

821 Advanced Vitamins and Minerals Spring. 2(2-0) P: HNF 820 or approval of

department The function of vitamins and minerals in human nutrition

823 Research Methods in Human Nutrition

Spring. 1(2-0) RB: Statistics course Survey of research methods used in human nutrition.

824 Nutrition Policies and Programs

Fall. 1(2-0) P: HNF 150 or HNF 260 or approval of department

Overview of U.S. nutrition policies and programs, including case studies, development and methods of evaluation.

825 Nutritional Immunology

Fall. 1(2-0) RB: Undergraduate physiology, biochemistry, cell biology, epidemiology Role of nutritional status on immune function and infectious disease.

826 Obesity and Chronic Disease

Spring. 1(2-0) P: HNF 820 RB: Undergraduate physiology, biochemistry, cell biology, epidemiology Adipose biology and the role of obesity in chronic

Adipose biology and the role of obesity in chronic disease including diabetes, heart disease and cancer.

830 International Nutrition Summer. 1(1-0)

Major issues in international nutrition that influence health, survival, and development capacity of people living in developed and developing societies. Approaches to improving nutritional well-being of populations.

840 Human Nutrition and Chronic Diseases Fall of odd years. 3(3-0)

eases: obesity, cardiovascular disease, diabetes,

Fall of odd years. 3(3-0) Dietary intervention and treatment of chronic dis-

843 Community Nutritional Assessment

gastrointestinal disorders and cancer.

Spring of odd years. 3(2-2) Nutritional assessment of population groups in community settings. Interpretation of national and international health data.

850 Advanced Clinical Nutrition and Professional Issues in Dietetic Practice

Fall, Spring, Summer. 1 to 3 credits. R: Approval of department.

Practice of dietetics and nutrition in foodservice, community and clinical settings. Integration of the American Dietetic Association's codes of ethics and standards of professional practice.

890 Supervised Individual Study

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. A student may earn a maximum of 10 credits Students are limited to a combined total of 10 credits in HNF 890 and HNF 894. R: Open only to graduate students in the Department of Food Science and Human Nutrition.

Faculty supervised study of nutrition areas of individual interest.

891 Topics in Human Nutrition

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Open only to graduate students.

Current topics in applied and basic human nutrition.

892 Nutrition Seminar

Fall, Spring. 1(1-0) A student may earn a maximum of 6 credits in all enrollments for this course.

Presentations by students on current topics in nutrition.

894 Human Nutrition Practicum

Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 6 credits in all enrollments for this course. A student may earn a maximum of 10 credits Students are limited to a combined total of 10 credits in HNF 890 and HNF 894. Approval of department. R: Open only to graduate students in the Department of Food Science and Human Nutrition.

Experience in agencies or offices related to Human Nutrition. Field experience required.

898 Master's Project

Fall, Spring, Śummer. 1 to 5 credits. A student may earn a maximum of 5 credits in all enrollments for this course. R: Open to masters students in the Human Nutrition major. Directed scholarly participation in support of Plan B master's degree requirements in human nutrition.

899 Master's Thesis Research

Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 20 credits in all enrollments for this course. R: Open only to masters students in Human Nutrition and Foods.

Master's thesis research.

935 Nutrition: Lipid and Carbohydrate Metabolism

Fall of even years. 3(3-0) Interdepartmental with Animal Science. Administered by Human Nutrition and Foods.

Regulatory aspects of lipid and carbohydrate metabolism as influenced by nutritional status.

936 Protein Nutrition and Metabolism

Spring of odd years. 3(3-0) Interdepartmental with Animal Science. Administered by Animal Science.

Nutritional and endocrine regulation of protein synthesis and degradation, protein quality assessment, protein status, and protein-energy malnutrition. Protein metabolism during exercise. Metabolism, digestion, and absorption of amino acids and proteins.

999 Doctoral Dissertation Research

Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 99 credits in all enrollments for this course. R: Open only to doctoral students in the Human Nutrition and Foods major.

Doctoral dissertation research.
